

GLENCORE

NEWS RELEASE

Baar, 30 January 2025

Full Year 2024 Production Report

Glencore Chief Executive Officer, Gary Nagle:

"2024 was an important year for Glencore, with the acquisition of EVR and shareholder support for the retention of our coal business. Our Industrial asset teams continue to refine their optimal production pathways and I am pleased to report a net overall addition to our 2024 mineral reserve base, notably in copper at Antamina, bauxite at MRN, and steelmaking coal via the acquisition of EVR, following the significant growth in our Argentina copper resources base reported in 2023. Updated guidance covering production and capex for the 2025-28 period, as well as 2025 unit cost guidance, will be provided alongside the release of our 2024 Preliminary results on 19 February."

"2024 production volumes were delivered within our guidance ranges (unchanged from the beginning of the year), reflecting stronger second half (H2) performances across our key commodities. Copper production was 26kt higher in H2 (+6% vs H1), supported by Antapaccay's recovery from H1 geotechnical issues and higher grades at KCC. In zinc, H2 volumes jumped 71kt (+17% vs H1), reflecting increased contributions across the board, including from Kazzinc, Mount Isa and Antamina. In coal, energy volumes increased 5.2Mt in H2 in line with operational and logistical improvements in Australia and South Africa, while Steelmaking coal added 13.1Mt in H2 (a near-fivefold increase vs H1), reflecting the 12.5Mt contribution from EVR."

Production from own sources – Total¹

		2024	2023	Change %
Copper	kt	951.6	1,010.1	(6)
Cobalt	kt	38.2	41.3	(8)
Zinc	kt	905.0	918.5	(1)
Lead	kt	185.9	182.7	2
Nickel	kt	82.3	97.6	(16)
Gold	koz	738	747	(1)
Silver	koz	19,286	20,011	(4)

Steelmaking coal	mt	19.9	7.5	165
Energy coal	mt	99.6	106.1	(6)

¹ Controlled industrial assets and joint ventures only. Production is on a 100% basis, except as stated later in this report.

Production highlights

- On a like-for-like basis, removing 15,000 tonnes of Cobar (sold in June 2023) volumes from the prior period, own sourced copper production of 951,600 tonnes was 43,500 tonnes (4%) below 2023. This reflected lower planned production at Antapaccay and Collahuasi, further impacted by geotechnical-related delays at Antapaccay and lower grades and unplanned mill downtime at KCC. H2 2024 copper production of 489,000 tonnes was 26,400 tonnes (6%) higher than H1 2024, mainly reflecting improved KCC production due to higher-grade ores, higher than planned run-rates at Mutanda and increased Mount Isa copper production, following a regional flooding event earlier in the year.
- Own sourced cobalt production of 38,200 tonnes was 3,100 tonnes (8%) lower than 2023, mainly reflecting expected lower grades at Mutanda.
- Own sourced zinc production from the zinc department itself (i.e. excluding Antamina) was 51,000 tonnes (7%) higher than 2023. Overall own sourced zinc production of 905,000 tonnes was broadly in line with 2023, reflecting lower zinc tonnes from Antamina (64,500 tonnes), given its expected copper/zinc mine sequence during the year, largely offset by the ramp up of Zhairam (Kazzinc, up 53,600 tonnes). H2 2024 zinc production of 487,800 tonnes was 70,600 tonnes (17%) higher than H1 2024.
- Excluding Koniambo (KNS), own sourced nickel production of 77,300 tonnes was 6,900 tonnes (10%) higher than 2023. Overall own sourced nickel production of 82,300 tonnes was 15,300 tonnes (16%) lower than 2023, reflecting KNS's transition to care and maintenance (22,200 tonnes) in Q1 2024, partially offset by recovery from the INO supply chain constraints seen in the base period (3,700 tonnes) and higher production from Murrin Murrin (3,200 tonnes).
- Attributable ferrochrome production of 1,166,000 tonnes was in line with 2023.
- Steelmaking coal production of 19.9 million tonnes mainly reflects Canadian steelmaking coal production of 12.5 million tonnes, representing the Elk Valley Resources (EVR) business acquired in July 2024. Australian steelmaking coal production was consistent year over year.

HIGHLIGHTS

continued

- Energy coal production of 99.6 million tonnes was down 6% on 2023, reflecting the progressive impact of scheduled mine closures, longwall moves in Australia in 2024, export rail constraints in South Africa and a combination of permit delays, community blockades and unusually heavy rain at Cerrejón.

Notes for Editors

Glencore is one of the world's largest global diversified natural resource companies and a major producer and marketer of more than 60 commodities that advance everyday life. Through a network of assets, customers and suppliers that spans the globe, we produce, process, recycle, source, market and distribute the commodities that support decarbonisation while meeting the energy needs of today.

With over 150,000 employees and contractors and a strong footprint in over 35 countries in both established and emerging regions for natural resources, our marketing and industrial activities are supported by a global network of more than 50 offices.

Glencore's customers are industrial consumers, such as those in the automotive, steel, power generation, battery manufacturing and oil sectors. We also provide financing, logistics and other services to producers and consumers of commodities.

Glencore is proud to be a member of the Voluntary Principles on Security and Human Rights and the International Council on Mining and Metals. We are an active participant in the Extractive Industries Transparency Initiative.

We will support the global effort to achieve the goals of the Paris Agreement through our efforts to decarbonise our own operational footprint. We believe that we should take a holistic approach and have considered our commitment through the lens of our global industrial emissions. For more information see our 2024-2026 Climate Action Transition Plan and the About our emissions calculation and reporting section in our 2023 Annual Report, available on our website at glencore.com/publications.

¹ Controlled industrial assets and joint ventures only. Production is on a 100% basis, except for joint ventures, where the Group's attributable share of production is included.

² Cobalt contained in concentrates and hydroxides.

³ The Group's pro-rata share of Collahuasi production (44%).

⁴ The Group's pro-rata share of Antamina production (53.75%).

⁵ Copper metal includes copper contained in copper concentrates and blister.

⁶ The Group's attributable 79.5% share of the Glencore-Merafe Chrome Venture.

OPERATING HIGHLIGHTS**Copper assets**

On a like-for-like basis, removing 15,000 tonnes of Cobar (sold in June 2023) volumes from the prior period, own sourced copper production of 951,600 tonnes was 43,500 tonnes (4%) below 2023. This reflected lower planned production at Antapaccay and Collahuasi, further impacted by geotechnical-related delays at Antapaccay and lower grades and unplanned mill downtime at KCC. H2 2024 copper production of 489,000 tonnes was 26,400 tonnes (6%) higher than H1 2024, mainly reflecting improved KCC production due to higher-grade ores, higher than planned run-rates at Mutanda and increased Mount Isa copper production, following a regional flooding event earlier in the year.

Own sourced cobalt production of 38,200 tonnes was 3,100 tonnes (8%) lower than 2023, reflecting expected lower grades at Mutanda.

African Copper

Own sourced copper production of 224,500 tonnes was 17,000 tonnes (7%) lower than 2023, mainly reflecting lower grades and unplanned mill downtime at KCC. H2 2024 copper production of 123,900 tonnes was 23,300 tonnes (23%) higher than H1 2024, reflecting planned development into higher-grade mining areas.

Own sourced cobalt production of 35,100 tonnes was 3,700 tonnes (10%) lower than 2023, mainly reflecting expected lower grades at Mutanda.

Collahuasi

Attributable copper production of 245,800 tonnes was 6,400 tonnes (3%) lower than 2023, primarily due to planned lower metal content in the pit sequence and lower recoveries as a result of complex mineralogy and water constraints, particularly in H2 2024.

Antamina

Attributable copper production of 144,700 tonnes was broadly in line with 2023.

Attributable zinc production of 92,100 tonnes was 64,500 tonnes (41%) lower than 2023, reflecting the expected mining sequence during the year, characterised by higher copper/lower zinc grades.

South America

Copper production of 219,900 tonnes was 18,900 tonnes (8%) below 2023, reflecting Antapaccay's anticipated higher strip ratio in 2024, further impacted by mine sequence delays due to geotechnical challenges in Q2 2024, partly offset by increased production from Lomas Bayas.

Copper custom metallurgical assets

Copper anode production of 440,800 tonnes was in line with 2023. Q4 2024 production of 127,700 tonnes was 34% higher than Q4 2023, mainly reflecting Altonorte's periodic maintenance shutdown in the base period.

Copper cathode production of 463,600 tonnes was 43,700 tonnes (9%) lower than 2023, reflecting Pasar's planned plant maintenance during June-July 2024.

Zinc assets

Own sourced zinc production from the zinc department itself (i.e. excluding Antamina) was 51,000 tonnes (7%) higher than 2023. Overall own sourced zinc production of 905,000 tonnes was broadly in line with 2023, reflecting lower zinc tonnes from Antamina (64,500 tonnes), given its expected copper/zinc mine sequence during the year, largely offset by the ramp up of Zhairam (Kazzinc, up 53,600 tonnes). H2 2024 zinc production of 487,800 tonnes was 70,600 tonnes (17%) higher than H1 2024.

Kazzinc

Own sourced zinc production of 227,500 tonnes was 53,600 tonnes (31%) higher than 2023, reflecting Zhairam's ramp up.

Own sourced lead production of 41,900 tonnes was 6,300 tonnes (18%) higher than 2023, also due to Zhairam's ramp up.

Own sourced copper production of 17,400 tonnes was 2,600 tonnes (18%) higher than 2023, due to an unscheduled furnace shutdown at the copper smelter in the base period.

Australia

Zinc production of 548,400 tonnes was in line with 2023.

Lead production of 144,000 tonnes was broadly in line with 2023.

Copper production of 67,400 tonnes was broadly in line with 2023.

North America

Zinc production of 37,000 tonnes was 1,600 tonnes (4%) lower than 2023, due to expected lower grades.

Zinc custom metallurgical assets

Zinc metal production of 874,500 tonnes was 121,900 tonnes (16%) higher than 2023, mainly reflecting the restart of Nordenham Zinc in February 2024.

Lead metal production of 197,900 tonnes was 46,700 tonnes (19%) lower than 2023, reflecting supply delays from Mount Isa to Northfleet and Portovesme's lead line being in care and maintenance.

METALS AND MINERALS

continued

Nickel assets

Excluding KNS, own sourced nickel production of 77,300 tonnes was 6,900 tonnes (10%) higher than 2023. Overall own sourced nickel production of 82,300 tonnes was 15,300 tonnes (16%) lower than 2023, reflecting KNS's transition to care and maintenance (22,200 tonnes) in Q1 2024, partially offset by recovery from the INO supply chain constraints seen in the base period (3,700 tonnes) and higher production from Murrin Murrin (3,200 tonnes).

Integrated Nickel Operations (INO)

Own sourced nickel production of 43,000 tonnes was 3,700 tonnes (9%) higher than 2023, reflecting that the base period endured supply chain constraints and follow-on impacts from the Raglan strike in 2022, while maintenance outages impacted the Sudbury smelter in H2 2024. Total refinery production of 98,400 tonnes was 3% higher than the comparable 2023 period.

Murrin Murrin

Own sourced nickel production of 34,300 tonnes was 3,200 tonnes (10%) higher than 2023, due to longer than planned maintenance in the base period.

Ferroalloys assets

Attributable ferrochrome production of 1,166,000 tonnes was in line with 2023.

ENERGY AND STEELMAKING COAL

¹ Controlled industrial assets and joint ventures only. Production is on a 100% basis, except for joint ventures, where the Group's attributable share of production is included.

OPERATING HIGHLIGHTS

Coal assets

Steelmaking coal production of 19.9 million tonnes mainly reflects Canadian steelmaking coal production of 12.5 million tonnes, representing the Elk Valley Resources (EVR) business acquired in July 2024. Australian steelmaking coal production was consistent year over year.

Energy coal production of 99.6 million tonnes was down 6% on 2023, reflecting the progressive impact of scheduled mine closures, longwall moves in Australia in 2024, export rail constraints in South Africa and a combination of permit delays, community blockades and unusually heavy rain at Cerrejón.

Canadian steelmaking

EVR production of 12.5 million tonnes reflects the post-acquisition period from 11 July 2024.

Australian steelmaking

Production of 7.4 million tonnes was in line with 2023.

Australian thermal and semi-soft

Production of 63.9 million tonnes was 2.4 million tonnes (4%) lower than 2023, due to longwall moves at Ulan and the base period inclusion of 1.4 million tonnes from Liddell mine, prior to its closure in July 2023.

South African thermal

Production of 16.6 million tonnes was 1.2 million tonnes (7%) lower than 2023, mainly reflecting measures implemented in 2023-24 to reduce coal production due to export rail capacity constraints. Should additional rail capacity be restored, production rates could be increased.

Cerrejón

Production of 19.1 million tonnes was 2.9 million tonnes (13%) lower than 2023, due to community blockades and permitting delays which impacted planned mine sequencing, in combination with unusually heavy rains in Q4 2024.

Oil assets

Exploration and production (non-operated)

Entitlement interest oil production of 4.0 million boe was 0.8 million boe (16%) lower than 2023, largely due to natural field declines.

Important notice

This document does not constitute or form part of any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for any securities. This document does not purport to contain all of the information you may wish to consider.

Cautionary statement regarding forward-looking information

Certain descriptions in this document are oriented towards future events and therefore contains statements that are, or may be deemed to be, "forward-looking statements" which are prospective in nature. Such statements may include, without limitation, statements in respect of trends in commodity prices and currency exchange rates; demand for commodities; reserves and resources and production forecasts; expectations, plans, strategies and objectives of management; expectations regarding financial performance, results of operations and cash flows, climate scenarios; sustainability (including, without limitation, environmental, social and governance) performance-related goals, ambitions, targets, intentions and aspirations; approval of certain projects and consummation and impacts of certain transactions (including, without limitation, acquisitions and disposals); closures or divestments of certain assets, operations or facilities (including, without limitation, associated costs); capital costs and scheduling; operating costs and supply of materials and skilled employees; financings; anticipated productive lives of projects, mines and facilities; provisions and contingent liabilities; and tax, legal and regulatory developments.

These forward-looking statements may be identified by the use of forward-looking terminology, or the negative thereof including, without limitation, "outlook", "guidance", "trend", "plans", "expects", "continues", "assumes", "is subject to", "budget", "scheduled", "estimates", "aims", "forecasts", "risks", "intends", "positioned", "predicts", "projects", "anticipates", "believes", or variations of such words or comparable terminology and phrases or statements that certain actions, events or results "may", "could", "should", "shall", "would", "might" or "will" be taken, occur or be achieved. The information in this document provides an insight into how we currently intend to direct the management of our businesses and assets and to deploy our capital to help us implement our strategy. The matters disclosed in this document are a 'point in time' disclosure only. Forward-looking statements are not based on historical facts, but rather on current predictions, expectations, beliefs, opinions, plans, objectives, goals, intentions and projections about future events, results of operations, prospects, financial conditions and discussions of strategy, and reflect judgments, assumptions, estimates and other information available as at the date of this document or the date of the corresponding planning or scenario analysis process.

By their nature, forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause actual results, performance or achievements to differ materially from any future events, results, performance, achievements or other outcomes expressed or implied by such forward-looking statements. Important factors that could impact these uncertainties include, without limitation, those disclosed in the risk management section of our latest Annual Report and/or Half-Year Report, which can each be found on our website. These risks and uncertainties may materially affect the timing and feasibility of particular developments. Other factors which may impact risks and uncertainties include, without limitation: the ability to produce and transport products profitably; demand for our products and commodity prices; development, efficacy and adoption of new or competing technologies; changing or divergent preferences and expectations of our stakeholders; events giving rise to adverse reputational impacts; changes to the assumptions regarding the recoverable value of our tangible and intangible assets; inadequate estimates of resources and reserves; changes in environmental scenarios and related regulations, including, without limitation, transition risks and the evolution and development of the global transition to a low carbon economy; recovery rates and other operational capabilities; timing, quantum and nature of certain acquisitions and divestments; delays, overruns or other unexpected developments in connection with significant projects; the ability to successfully manage the planning and execution of closure, reclamation and rehabilitation of industrial sites; health, safety, environmental or social performance incidents; labor shortages or workforce disruptions; natural catastrophes or adverse geological conditions, including, without limitation, the physical risks associated with climate change; effects of global pandemics and outbreaks of infectious disease; the outcome of litigation or enforcement or regulatory proceedings; the effect of foreign currency exchange rates on market prices and operating costs; actions by governmental authorities, such as changes in taxation or laws or regulations or changes in the decarbonisation policies and plans of other countries; breaches of Glencore's policy framework, applicable laws or regulations; the availability of sufficient credit and management of liquidity and counterparty risks; changes in economic and financial market conditions generally or in various countries or regions; political or geopolitical uncertainty; and wars, political or civil unrest, acts of terrorism, cyber attacks or sabotage.

Readers, including, without limitation, investors and prospective investors, should review and consider these risks and uncertainties (as well as the other risks identified in this document) when considering the information contained in this document. Readers should also note that the high degree of uncertainty around the nature, timing and magnitude of climate-related risks, and the uncertainty as to how the energy transition will evolve, makes it particularly difficult to determine all potential risks and opportunities and disclose these and any potential impacts with precision. Neither Glencore nor any of its affiliates, associates, employees, directors, officers or advisers, provides any representation, warranty, assurance or guarantee as to the accuracy, completeness or correctness, likelihood of achievement or reasonableness of any forward-looking information contained in this document or that the events, results, performance, achievements or other outcomes expressed or implied in any forward-looking statements in this document will actually occur. Glencore cautions readers against reliance on any forward-looking statements contained in this document, particularly in light of the long-term time horizon which this document discusses in certain instances and the inherent uncertainty in possible policy, market and technological developments in the future.

No statement in this document is intended as any kind of forecast (including, without limitation, a profit forecast or a profit estimate), guarantee or prediction of future events or performance and past performance cannot be relied on as a guide to future performance.

Except as required by applicable rules or laws or regulations, Glencore is not under any obligation, and Glencore and its affiliates expressly disclaim any intention, obligation or undertaking, to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. This document shall not, under any circumstances, create any implication that there

has been no change in the business or affairs of Glencore since the date of this document or that the information contained herein is correct as at any time subsequent to its date.

Sources

Certain statistical and other information included in this document is sourced from publicly available third-party sources. This information has not been independently verified and presents the view of those third parties, and may not necessarily correspond to the views held by Glencore and Glencore expressly disclaims any responsibility for, or liability in respect of, and makes no representation or guarantee in relation to, such information (including, without limitation, as to its accuracy, completeness or whether it is current). Glencore cautions readers against reliance on any of the industry, market or other third-party data or information contained in this document.

Information preparation

In preparing this document, Glencore has made certain estimates and assumptions that may affect the information presented. Certain information is derived from management accounts, is unaudited and based on information Glencore has available to it at the time. Figures throughout this document are subject to rounding adjustments. The information presented is subject to change at any time without notice and we do not intend to update this information except as required.

This document contains alternative performance measures which reflect how Glencore's management assesses the performance of the Group, including results that exclude certain items included in our reported results. These alternative performance measures should be considered in addition to, and not as a substitute for, or as superior to, measures of financial performance or position reported in accordance with IFRS. Such measures may not be uniformly defined by all companies, including those in Glencore's industry. Accordingly, the alternative performance measures presented may not be comparable with similarly titled measures disclosed by other companies. Further information can be found in our reporting suite available at [glencore.com/publications](https://www.glencore.com/publications).

Subject to any terms implied by law which cannot be excluded, Glencore accepts no responsibility for any loss, damage, cost or expense (whether direct or indirect) incurred by any person as a result of any error, omission or misrepresentation in information in this document.

Other information

The companies in which Glencore plc directly and indirectly has an interest are separate and distinct legal entities. In this document, "Glencore", "Glencore group" and "Group" are used for convenience only where references are made to Glencore plc and its subsidiaries in general. These collective expressions are used for ease of reference only and do not imply any other relationship between the companies. Likewise, the words "we", "us" and "our" are also used to refer collectively to members of the Group or to those who work for them. These expressions are also used where no useful purpose is served by identifying the particular company or companies.
